You're Not Alone – We're Here to Help

You're Not Alone

1 in 5 GP appointments are for non-medical needs. We're here to ensure you receive the right care and support, no matter the issue.

Whether it's your health, well-being, or something else affecting your daily life we can help.

Your Health, Your Way – More Help Than Ever Before

Thanks to the NHS GP Access Recovery Plan, your local GP practice is expanding the ways we support you.

Since 2019, over 31,000 new healthcare professionals have joined general practices across the country including right here at Meir and Weston Coyney Medical Practice. Now, in addition to seeing your GP or nurse, you have access to a whole team of experts ready to help.

Who's Here to Help?

Pharmacists – For medication advice, prescriptions, or treatment queries

Mental Health Practitioners – Support for anxiety, stress, low mood & more

Physiotherapists – Direct help for back pain, joint issues, and injuries

Social Prescribing Link Workers – Support for non-medical concerns like loneliness, housing, benefits, or money worries

These professionals are based in your local GP practice.

How it Works

When you call or visit the practice, a trained member of our team will ask a few questions to guide you to the right person.

Examples:

Muscle pain or injury? → See the physiotherapist

Feeling isolated or anxious? → Book with a mental health or social prescribing link worker

Medication questions? → Speak to the clinical pharmacist

You can still always choose to see your GP but now, there are more ways to get the help you need.

We also look at the whole picture.

If you see your GP or nurse and they feel you could benefit from extra support, they can refer you directly to another member of our care team like a physiotherapist, mental health practitioner, or social prescribing link worker.
